SHREDDER LEVELS

Destroyit Business Shredders are equipped with a wide variety of cutting heads. Models are available in each of the six security levels defined under the new DIN 66399 International Standard.

SECURITY LEVEL P-2

Material particle surface $\leq 800 \text{ mm}^2$ or strip width $\leq 6 \text{ mm}$.
Strip length not determined.

SECURITY LEVEL P-5

Material particle surface $\leq 30 \text{ mm}^2$ and for regular particles:
strip width $\leq 2 \text{ mm}$ (2 x 15 mm particles, for example).

SECURITY LEVEL P-3

Material particle surface $\leq 320 \text{ mm}^2$ (4 x 80 mm particles, for example) or strip width $\leq 2 \text{ mm}$. Strip length not determined.

SECURITY LEVEL P-6

Material particle surface $\leq 10 \text{ mm}^2$ and for regular particles:
strip width $\leq 1 \text{ mm}$ (0.8 x 12 mm particles, for example).

SECURITY LEVEL P-4

Material particle surface $\leq 160 \text{ mm}^2$ and for regular particles:
strip width $\leq 6 \text{ mm}$ (4 x 40 mm particles, for example).

SECURITY LEVEL P-7

Material particle surface $\leq 5 \text{ mm}^2$ and for regular particles:
strip width $\leq 1 \text{ mm}$ (.8 x 5 mm particles, for example).
