EXCELTOPIC-380™

The ExcelTopic-380™ is a compact on-demand single-sided specialty finishing system. With maximum sheet size capabilities up to 15"W x 31.5"L this unit is an excellent complement for any print engine on the market today. Adjustable de-curling system creates consistently flat output and the automatic separation system ensures perfectly separated sheets. SleekerDigital™ comes standard with this laminator, technology that bonds to digital output presenting a vast array of finishing options including variable data spot foiling, spot gloss, and spot holographic special effects. The high pressure nip roller system on this laminator gives superior results to most comparable machines with spring pressure roller systems. The ExcelTopic-380™ outstanding versatility, ease of use, and ability to add value to print has never been easier and more economical.

SleekerDigital™ Technology bonds metallic foils, spot gloss and holographic effects to digital print.
Adjustable on th fly decurling device for lay-flat output.

Semi-Automatic feeder, and automatic sheet separator.
