

GPM 320

12.6" Manual Crease & Perforator

Creasing and perforating machine GPM 320 is a follower of successful model GPM 315. It was designed for the final processing of graphic materials up to SRA 3 paper size. Simple hand machine with working width 320 mm enables to make a crease as well as perforation of the same quality as electric machines GPM 450/450 SA. Eccentric wheel of operating mechanism demands only minimum power to process the paper even for heavy stock. Skew paper can be also creased/perforated due to thumbwheel angle adjustment of the side guide.

Max. 12.6" Width x
Any Length

Specifications	
Max. Stock Size	12.6" wide by any length
Stock Weight	20lb bond - 20 pt
Impression Control	Manual
Dimensions	18.51"L x 14.57"W x 14.18"H
Weight	24 lbs
Floor Model	Tabletop
Perf Blades	1
Score Blades	1
