

BEARGRIP

DUPLEXING SYSTEM

Available in
Canada

The **14" Beargrip Duplexing System** applies adhesive onto paper up to 13" wide, any length. Suitable for most paper stock up to 14 point or 310 gr.

Our **adhesive** is recommended for gluing, offering excellent lay-flat & neutral pH. After gluing the top sheet you place it on the **Alignment Board** which allows you to accurately place the glued sheet on top of the bottom sheet.

The **Mounting Press** squeezes the glued sheets together, insuring excellent contact and eliminating any air bubbles.

Available in a manual 14" roller unit. A dry paint roller can also be used to smooth glued sheets, but the Adjutant increases production.

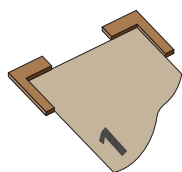

Adjustable corner brackets with strong magnets allow for easy size changes of paper width.

After the sheets are glued together they are placed under a **weighted board** for about 30 minutes to preventing warping.

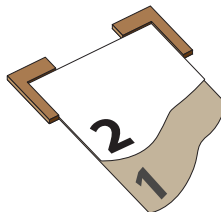

BEARGRIP SHEET DUPLEXING SYSTEM

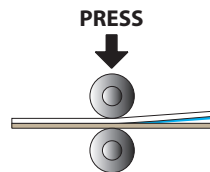

1. Place 1st sheet in brackets facing down

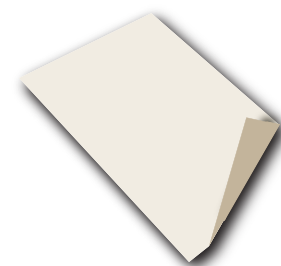

2. Apply glue to back of 2nd sheet

3. Place 2nd sheet on top of 1st sheet

4. Press & Smooth sheets together

5. A Duplex sheet. A combination of the two

GVDIRECT™
Finish Well

GVDirect™ diligently works to ensure our performance lineup of laminate films, digital technologies, equipment, and all things finishing work for our customers to gain consumer attention and market share. GVDirect™ diligently endeavors to deliver value in service, product, and equipment that surpass market demands, support productivity, and uphold social and environmental integrity.
